EDUCATION

Bachelors of Computer Application, GLA University, Mathura	**88**	**June, 2027**
Intermediate, VDJS, Kosi Kalan	**87.4**	**May, 2024**
High School, VDJS, Kosi Kalan	**84.16**	**May, 2022**

SKILLS

TECHNICAL

Programming Languages: DSA, JAVA, PYTHON, C
Web Technologies: HTML5, CSS3, JAVASCRIPT(BASICS), REACT(BEGINNER), WORDPRESS
TOOLS: GitHub, MongoDB, Oracle, Eclipse, VS Code, Arduino

PROFESSIONAL: Leadership, Teamwork, Excellent Communication, Adaptability

---

PROJECTS

Snap Solve – Civic Governance Platform (Ongoing Mini Project)

Working on a civic governance web platform that allows citizens to report verified local issues using live, location-based photos, display them on a district-wise public feed, and enable authorities and magistrates to review and resolve issues with before-and-after photo proof to ensure transparency and accountability.
Technologies: React.js, Node.js, Express.js, MongoDB / MySQL

Food Wastage Reduction Platform | Web Project

Developed a Food Wastage Reduction Platform to promote food redistribution and minimize food loss. The project was designed, developed and deployed as a live web application.

Live URL: https://vish-as09.github.io/food-wastage-reduction-platform/

- **Bus Booking System – Java (MINI PROJECT)**
  Developed a menu-driven Java console application to manage bus initialization, seat availability, ticket booking, cancellation, ticket summary and route-wise fare calculation for multiple routes (Delhi–Jaipur, Delhi–Haridwar and Delhi–Agra) using HashTables and core OOP concepts.
- **Restaurant Ordering & Billing System – Java (MINI PROJECT)**
  Developed a Java console application using HashMap, inheritance, abstraction and file handling.

CO-CURRICULAR ACTIVITIES

- Participated Technavya'26, GLA, January 2026.
- Participated in Hackathons', Coda-thons', BCA-O-Crates Events'.

DECLARATION

I hereby declare that all the above-mentioned information is true and correct to the best of my knowledge.
